A simple, cleanly-designed and very safe harness, ideal for beginners
**EXENSE** is a harness designed specifically for novice pilots, and so we created a simple, cleanly-designed and safe product, which also provides comfort, with excellent detailing and finish. It is easy and quick to adjust, and so it is ideal for use on training slope by flying instructors.

- Side pockets in elastic webbing;
- The right-hand pocket includes a container specially designed for a radio;
- The lower part of the harness is reinforced, for optimum resistance to abrasion against ground;
- A whistle for attracting attention is built-in as part of the elastic chest strap buckle;
- The reserve parachute is located beneath the seat;
- High-visibility container on the right shoulder strap for the Security Card;

// Optionals

- Speed system
- Relax bar
- Cockpit for instruments and/or front ballast
- Polycarbonate seat plate
- Leg-cover
- Reserve parachute container for deployment from the left
Details of exense

- The rescue parachute handle. Available also for left hand extraction.

- The T-LOCK system with innovative light buckles.
